

Model: CAESAR s ESD

Protection Class: S3S FO SR CI

Article: RV20324

EU Regulations: EN ISO 20345:2022

DESCRIPTION

Safety shoes with BOA® Fit System - precise, micro-adjustable and durable.

These water-repellent safety footwears with a soft Nubuck-effect micro-fibre upper reduce the weight of the shoes thanks to the innovative sole made of latest-generation, ultra-light PU compound. Non-slip safety shoes with abrasion-resistant, oil-resistant and anti-static sole.

Safety is guaranteed by the Save & Flex Air anti-perforation system consisting of a hole-resistant fabric insole that makes this style of work shoe lighter than traditional styles. The use of highly innovative materials to produce the sole and anti-perforation system combined with the AirToe Aluminium toe cap which weighs just 54 g. has resulted in a significant reduction in the overall weight of the work shoes, making them more comfortable and better performing for the worker's long-term well-being.

Safety shoes with special protection of the sole against the cold (at temp. $\leq 10^{\circ}\text{C}.$), ideal for: transport and logistics sectors, electricians, carpenters, artisans, and warehouse workers.

Guaranteed comfort and well-being for feet is also provided by the U-Power Original insole with anatomical, anti-bacterial and self-modelling properties plus the WingTex air tunnel lining which ensures excellent breathability.

Safety shoes for men and women.

UPPER

Nubuck-effect, water-repellent microfibre

LINING

Wingtex® with breathable air tunnel

SAFETY TOE CAP

AirToe Aluminium

PIERCE-RESISTANCE

Save & Flex Air

FOOTBED
