

Model: **EGON**

Protection Class: **S1P SRC ESD**

Article: **RN20016**

EU Regulations: **EN ISO 20345:2011**

DESCRIPTION

Egon are safety shoes with a Made in Italy design characterised by the use of innovative materials that suit everyone's tastes, while maintaining their protection and comfort characteristics intact.

Comfortable, low-cut safety shoes with breathable nylon and suede microfibre upper with polyurethane reinforcement scuff-cap. Comfort is enhanced by the soft white calfskin lining that extends from the toes to the heel, wrapping the foot like a sock. The Infinergy® system and the soft expanded PU insole increase the already high perception of comfort and well-being of the foot as Infinergy® is an innovative technology designed to achieve an energy return of more than 55% at each step. Safety shoes in S1P SRC ESD standard protection equipped with U-Power Original insole, the innovative, breathable, antibacterial and anatomical insole in soft leather. Safety has always been the hallmark of U-Power safety footwear: AirToe Aluminium toe cap to protect the toes and the front part of the foot, and the Save & Flex PLUS textile anti-puncture system. Non-slip properties to ensure maximum stability and balance on even the most slippery or oily surfaces.
