

Model:

MERCIA

Protection Class:

S3 HRO HI SRC CI

Article:

0RR10724

EU Regulations:

EN ISO 20345:2022

DESCRIPTION

Mercia is a model of high and comfortable safety shoes made with a water repellent full-grain leather upper to guarantee protection from rain and moisture.

It features an AirToe® Composite toe cap and a completely “No Metal” puncture-resistant system that provide protection of the foot's toe and sole. The composite toe cap is extremely lightweight - weighing only 50 gr. – it does not weigh down the shoe, while the Save & Flex® PLUS puncture resistant system consists of a textile insole sewn directly onto the upper to give the foot's sole 100% protection.

Comfort and prolonged well-being are guaranteed by the presence of a highly breathable air tunnel lining and by the WOW insole, which thanks to its exceptional self-forming properties, is able to distribute the body weight evenly and protect the foot from small impacts and pressures, ensuring comfortable and breathable work shoes.

Non-slip, anti-oil and anti-static safety shoes with PU/Vibram sole providing special protection and insulation from cold and heat to always maintain an ideal temperature inside the shoe.

Mercia is a safety shoe suitable for wet and cold environments and in particular, for the steel industry.

UPPER

Water-repellent full-grain leather
