

Model: **YORK UK**

Protection Class:

S3 WR SRC CI

Article: **GO10224**

EU Regulations:

EN ISO 20345:2022

DESCRIPTION

Lightweight water repellent safety shoes with full-grain leather upper which ensures protection from the rain, water and damp thanks to the lining in GORE-TEX Performance membrane, which ensures long-lasting water repelling and excellent breathability.

The Action dry all-day comfort footbed guarantees healthy, comfortable feet thanks to its antifungal properties.

Gore tex work boots with AirToe® Composite safety toe cap and Save & Flex PLUS anti-puncture system to guarantee safety and protection of toes and the sole of the foot against the risk of objects accidentally falling or punctures due to nails or splinters.

Save & Flex Plus is also a totally "Metal Free" fabric insole, stitched directly on the sole which not only guarantees 100% surface protection, but is also much lighter than traditional anti-puncture systems.

Non-slip shoes with antistatic and oil resistant sole in compact PU with special protection against the cold.

Safety boots, ideal for working in cold and damp environments and, in particular, in the assembly, steel and mining sectors.
